DETAILED ACTION

Status of Claims

1. Applicant's reply filed on 5/19/2009 is acknowledged. Current pending claims are 9-16. Claims 9-16 are previously amended. Claims 1-8 are cancelled.

Response to Arguments

2. Applicant's arguments with respect to the rejection of claims 9-16 have been considered. The applicant's amendments to the claims do not substantively change the grounds for rejection; however, the arguments are persuasive. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive; therefore, the finality of that action is withdrawn. The rejection of claims 9-16 35 U.S.C. 103(a) as being unpatentable over Hoyle (UK Patent Application No. 2375812) are withdrawn. Upon further search, Clicques et al. (French Patent Publication No. FR1368101) was found to be pertinent to the claims; however, an Examiner's amendment has been approved which overcomes the reference. Claims 9-16 are now in condition for allowance.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Dresch on 6/4/2009.

The application has been amended as follows:

Art Unit: 1792

In claim 9, line 2, delete “a washing basket” and insert “a washing basket including crockery baskets for arranging objects to be washed; a spraying device for applying a rinsing liquid to the objects to be washed;”

In claim 16, line 2, delete “arranged in the pipe extending between the cooling side of the Peltier element and the heating side of the Peltier element” and insert “arranged one of in the pipe extending between the cooling side of the Peltier element and the heating side of the Peltier element and in the pipe downstream of the Peltier element.”

Allowable Subject Matter

4. Claims 9-16 are allowed.

5. The following is an examiner’s statement of reasons for allowance: Clicques et al. (French Patent Publication No. FR1368101) teaches an air guidance system, with racks (3), in which circulating air within the air guidance line (7) is exposed first to a cold side (b) of the Peltier element and secondly to the warm side (a) of the Peltier element before re-entering the drying chamber. Clicques et al. does not teach or suggest that the drying cabinet (1) is a dishwashing machine with water capable of spraying liquid to objects to be washed, Fig. 1, see below. Note: details of Clicques et al. were determined via an oral translation with Steven Spar, USPTO Translator, on 6/4/2009.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clicques et al. (French Patent Publication No. FR1368101) teaches an air guidance

Art Unit: 1792

system, with racks, in which circulating air is exposed first to a cold side of the Peltier element and secondly to the warm side of the Peltier element.
